

MedCare App — Tab Screens & Functionality

This document describes the layout, navigation, and functionality of all main bottom tabs in the MedCare mobile app.

App path: `app/medCare/`

Last updated: July 2026

Bottom navigation overview

Tab	Icon	Root screen	Stack
Home	home	HealthDashboardPage	HomeStack
Health	heart-pulse	HealthHomePage	HealthStack
Copilot	robot (center)	CopilotHome	CopilotStack
Community	account-group	CommunityHomeScreen	CommunityStack
You	account	AccountHomeScreen	YouStack

1. Home Tab

Bottom tab: 1st tab — **Home**

Root screen: `HealthDashboardPage` (main dashboard)

Stack: `HomeStack` → Dashboard, ServicesHub, Services

Main dashboard layout (top → bottom)

1. Header

- Greeting: "**Hi {firstName}** 🤖"
- Subtitle: "Your health hub is ready"
- Bell icon** → Notifications (You tab)
- Long-press bell → send test push notification

2. Search bar

- Placeholder: "Search doctors, medicines, lab tests..."
- Submit/search tap → **Health** → **Medicines List**

3. Quick care services (2×2 grid)

Tile	Action
Doctors	Services → Doctors list
Lab Tests	Services → Lab tests list
Medicines	Drawer → Pharmacies
Hospitals	Services → Hospitals list

4. AI Health Copilot banner

- Personalized AI summary (or default message)
- **View Briefing** → Copilot tab

5. Needs your attention

Dynamic list based on live data:

- **Medicines** → Health → Medicines
- **Lab Reports** → Health → Reports
- **Appointments** → You → Orders

6. Offers (promo carousel)

Swipeable banners:

- 25% OFF Medicines → Health → Medicines
- Consult Top Doctors → Services → Doctors
- Lab Tests at Home → Services → Lab tests
- Hospital Care → Services → Hospitals

7. Recommended for you

Tabbed section: **Doctors | Labs | Pharmacies | Hospitals**

- Cards from API (doctors, lab packages, pharmacies, hospitals)
- **See all** per tab
- Tap card → doctor profile, lab test, pharmacy detail, or hospital detail

Pull-to-refresh reloads health data, home recommendations, and gamification profile.

Sub-screens from Home

Screen	Purpose
Services Hub	Directory: Doctors, Lab tests, Specialists, Health packages, Hospitals, Medicines link
Services stack	Full consult flow: doctors, hospitals, lab tests, bookings, health packages

Data: live vs static

Feature	Source
Doctors, pharmacies, hospitals, lab packages	API (live)
Attention items	Health dashboard (live when logged in)
Promo banners	Static config
Recommended fallback	Mock data if API empty

Auth

- Works for guests; richer data when logged in
-

2. Health Tab

Bottom tab: 2nd tab — **Health**

Root screen: HealthHomePage — "Your Health Hub"

Stack: HealthStack

Health Hub layout (top → bottom)

1. Page header

- **Title:** "Your Health Hub"
- **Subtitle:** "Track records, reports, prescriptions, and family health in one place"

2. Health Overview hero card

- Health score
- Prescriptions count
- New reports count
- Family member count
- Next visit (from upcoming lab bookings)

3. Quick action grid (2×2)

Tile	Goes to	Badge
Reports	Lab Reports	e.g. "1 new report"
Medical Records	Medical Records	"Secure vault"
Prescriptions	Medicines list	e.g. "2 active"
Family Vault	Family Profiles	e.g. "3 members"

4. Needs attention

Actionable alerts (currently static demo data):

- CBC report ready → Reports
- 2 medicines due today → Medicines
- Family follow-up tomorrow → Family Vault

5. Recent activity

Timeline (currently static demo data):

- Lab test completed
- Prescription uploaded
- Appointment booked

6. Family health preview

- Horizontal cards for up to 3 family members
- **View Family Vault** → Family Profiles
- Tap member → member detail

Sub-screens

Reports (LabReports) — Auth required

- Summary: total reports, latest report, last updated
- **Track trends** — HbA1c trend chart when enough data
- **Recent reports** — list from lab API
- Empty state → **Book a Lab Test** (Services tab)

Medical Records (MedicalRecords) — Auth required

- Unified document vault (lab, orders, manual uploads)
- Search bar
- **Category chips:** All, Lab Reports, Prescriptions, Doctor Visits, Discharge, Vaccination, Imaging
- Upload new documents
- Tap record → view, booking details, delete manual uploads
- Pull-to-refresh

Prescriptions & Medicines (MedicinesList)

- Prescriptions summary card
- Upload prescription banner
- Search + segments: Active, Refill, OTC, Supplements
- Medicine list from API
- Product Detail → Cart → Checkout

Family Vault (FamilyProfiles) — Auth required

- Create family vault (if none)
- Summary card, add member
- **4 tabs:** Overview | Calendar | Copilot | Summary
- Add member modal
- Tap member → Family Member Detail

Family Member Detail (FamilyMemberDetail) — Auth required

- **Prescriptions:** upload photo, OCR extract, delete
- **Medicines:** saved/extracted list
- **Vitals:** log BP, sugar, weight, heart rate, SpO2; trends

Health History (HealthHistory) — Auth required

- Registered in navigation but **not linked from Health Hub UI**
- Blood group, member since, DOB
- Monthly healthcare timeline

Data: live vs static

Feature	Source
Health score	Gamification profile (live)
Lab reports & trends	Backend API (live)
Medical records	API + uploads (live)

Medicines list	Products API (live)
Family vault	Family vault API (live)
Active prescriptions count	Hardcoded (2)
Needs attention	Static demo
Recent activity	Static demo

3. Community Tab

Bottom tab: 4th tab — **Community**

Root screen: `CommunityHomeScreen`

Provider: `CommunityProvider` (live API + mock fallback)

Main screen layout

Header

- Title: **Community**
- **"Live community"** badge when API connected
- **+ button** → Create post (auth required)

4 segment tabs: Feed | Challenges | Groups | You

Feed

- **Filters:** All, Videos, Verified, Friends
- Up to 6 post cards
- Tap → Post Detail; like from feed
- Pull-to-refresh

Challenges

- **+ Create challenge**
- Your challenges (joined)
- Discover more / All challenges
- Tap → Challenge Detail

Groups

- **+ Create group**
- Group cards (join/leave)
- Tap → Group Detail

You (community profile)

- **Health buddies** → Buddies
- **Weekly health report** → Weekly Report
- Note: streaks/badges on Home tab

Guests: warning to sign in for post/group/challenge actions.

Sub-screens

Screen	Features
Post Detail	Full post, media, like, comments
Create Post	Text or video (optional group)
Challenge Detail	Progress, join/leave, log progress
Group Detail	Discussions + Members, join, add members
Create Group	New health group
Create Challenge	New wellness challenge
Add Group Member	Invite/add to group
Buddies	Manage health buddies
Add Buddy	Add a buddy
Weekly Report	Weekly progress view/share

Data

- Posts, groups, challenges from API when authenticated
- Mock fallback when API unavailable

4. You Tab

Bottom tab: 5th tab — **You**

Root screen: AccountHomeScreen (YouHome)

Modes: Guest vs Logged-in

Guest layout

- Guest welcome message
- **Sign in with phone**
- **Create account**
- **Browse without signing in:**
 - Lab Tests
 - Healthcare Services
 - My Orders

Auth screens: Phone Sign In, OTP Verify, Sign In, Register, Forgot Password

Logged-in layout (top → bottom)

1. Profile hero card

- Name, family health score, member count
- Tap → **Profile**

2. Quick actions (4 tiles)

Action	Goes to
My Orders	Orders list
Appointments	Orders list
Lab Reports	Health → Reports
Family Members	Health → Family Vault

3. Health summary card

- Medicines due, reports ready, upcoming visit

4. Account settings

Item	Screen
Addresses	Saved addresses
Payments	Payment methods
Notifications	Push prefs + recent list
Privacy & Security	Settings
Support	Help center

5. More services

- Lab Tests → Home Services
- Healthcare Services → Services Hub

6. Emergency support strip

- Opens Copilot with emergency prompt

7. Sign out

Sub-screens

Screen	Features
Profile	Personal info, blood group, health summary
Orders List	Filters: All, Meds, Labs, Doctors, Hospital, Rx; live tracking
Order Detail	Status, items, tracking
Appointment Chat	Doctor messaging
Addresses	Manage addresses
Payments	Payment methods
Notifications	Enable push, test push, prefs, recent list
Settings	Privacy, security, profile

Support	Contact, FAQs
---------	---------------

Data

- Profile, orders, family vault, notifications when logged in
- Guest browse only without auth
